Overview

This two-day course will cover the current management of pain interventions within a multidisciplinary framework.

The format will consist of short presentations, and keynote lectures dealing with controversial topics with an extensive proportion of the time spent on cadaver demonstrations.

The small number of participants will ensure the delivery of an individually tailored programme.

The course is suitable for doctors in Pain Medicine, Anaesthesia, Radiology, Orthopaedic Surgery, Neurosurgery and Palliative Care.

Objectives

To present a balanced approach of the different procedural interventions used in Pain Medicine. The recent advances in the diagnostic and treatment of chronic pain conditions secondary to degenerative or neurological disease will be presented by keynote speakers. Through discussions, the delegates will benefit from a faculty assembled from many leading Pain Centres.

Faculty Members include:

Shyam Balasubramanian
Ganesh Baranidharan
Arun Bhaskar
Surabhi Choudhary
Ron Cooper
Mohamed Dorgham
Teo Goroszeniuk
Vladimir Gorelov
Ashish Gulve
Thomas Haag
Tony Hammond

Dalvina Hanu-Cernat
(Course Convener)
